Requirement Gathering

Topic Name: Web-based Bus Ticket Reservation System

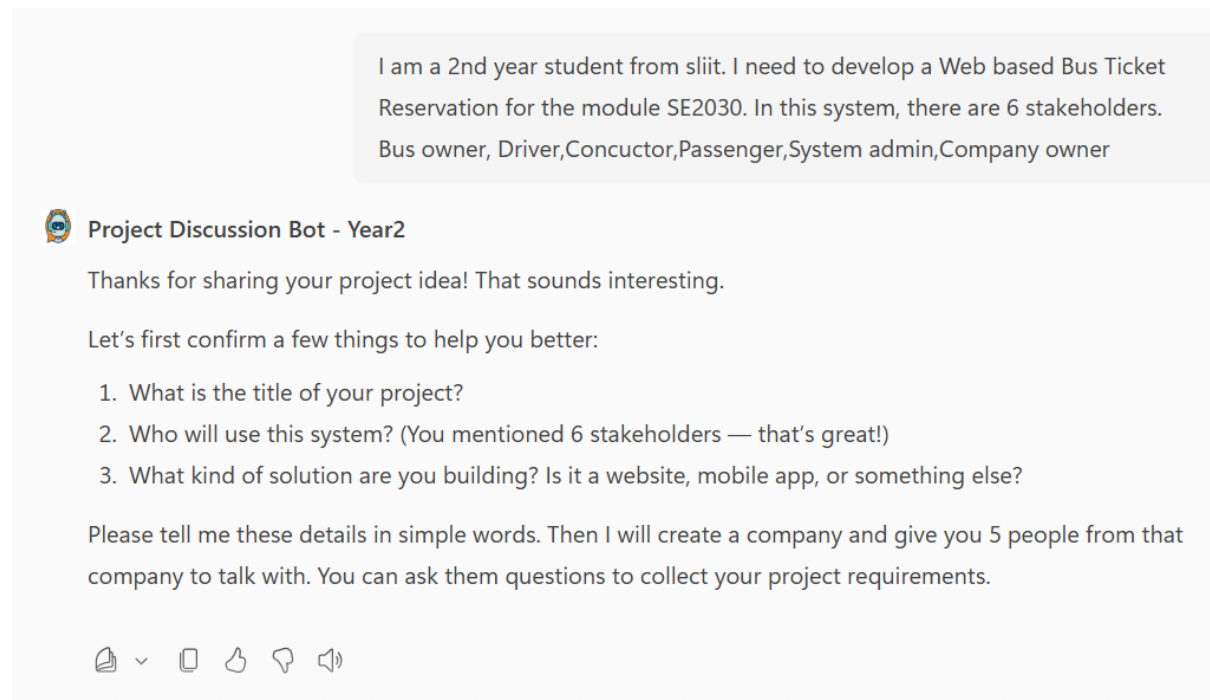

Figure 1: Using Chat Bot

Web based Bus Ticket Reservation System

 **Project Discussion Bot - Year2**

Great! Thank you for sharing your project title: **Web Based Bus Ticket Reservation System**.

Let me now create a company and give you 5 people from that company who will help you understand what they need from your system.

Your client company is called **LankaBus Travels (Pvt) Ltd.**

They run bus services across Sri Lanka and want a new online system for passengers to book tickets easily.

You will talk to 5 people from this company to collect your project requirements.

Here are the 5 people you can talk to:

1. **Mr. Nuwan Perera** – Bus Company Owner
2. **Ms. Shanika Silva** – System Administrator
3. **Mr. Ruwan Jayasena** – Bus Driver
4. **Mr. Sunil Fernando** – Bus Conductor
5. **Ms. Dilani Wickrama** – Passenger

You can now ask questions to any of them. Just type your question, and I will bring the right person to answer it. You can also say "next" to talk to another person.

Figure 2: Introducing Topic

include the passenger too, making 6 people

 **Project Discussion Bot - Year2**

Thank you! Now I understand your project is a **Web Based Bus Ticket Reservation System** for your SE2030 module at SLIIT.

Let's begin your client discussion.

Your client company is called **Senevi Lanka Bus Services (Pvt) Ltd.**

They run daily bus services across Sri Lanka and want a new online system for ticket booking and staff management.

You will collect requirements by talking to 6 people from this company.

Here are the 6 people you can talk to:

1. **Mr. Senevi Jayasundara** – Company Owner
2. **Ms. Nirmala Hettiarachchi** – System Administrator
3. **Mr. Ramesh Kumara** – Bus Driver
4. **Mr. Lalith Perera** – Bus Conductor
5. **Mr. Dinesh Silva** – Bus Owner
6. **Ms. Ishara Madushani** – Passenger

Figure 3: Identifying Stakeholders

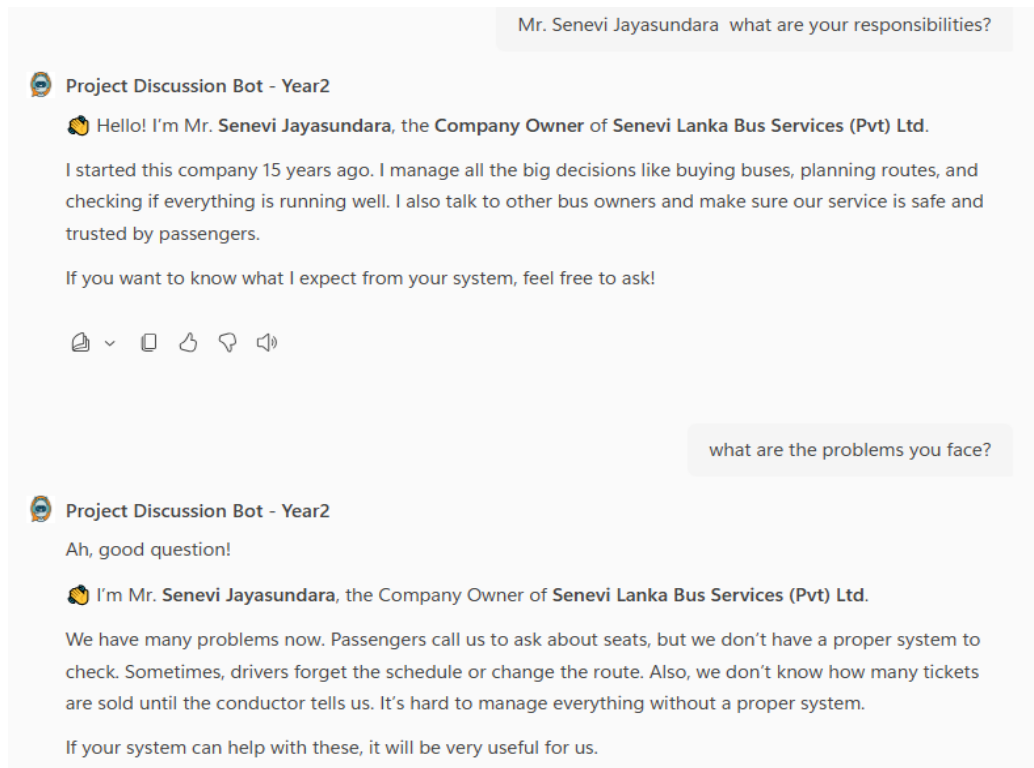

Figure 4: Stakeholder 1

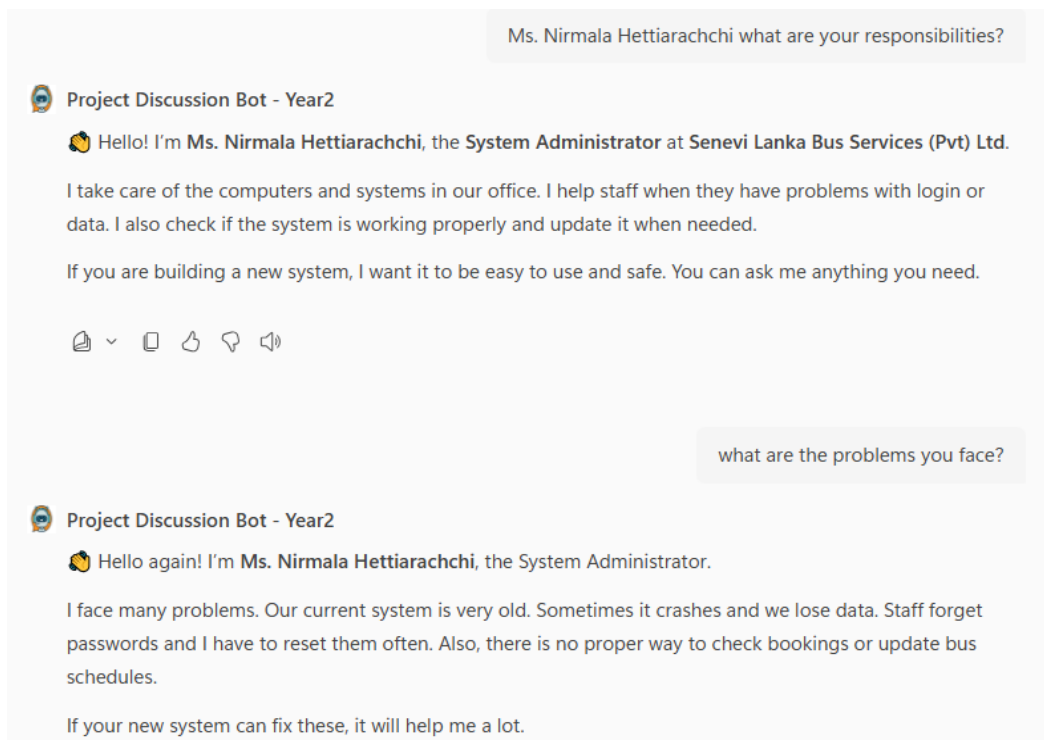

Figure 5: Stakeholder 2

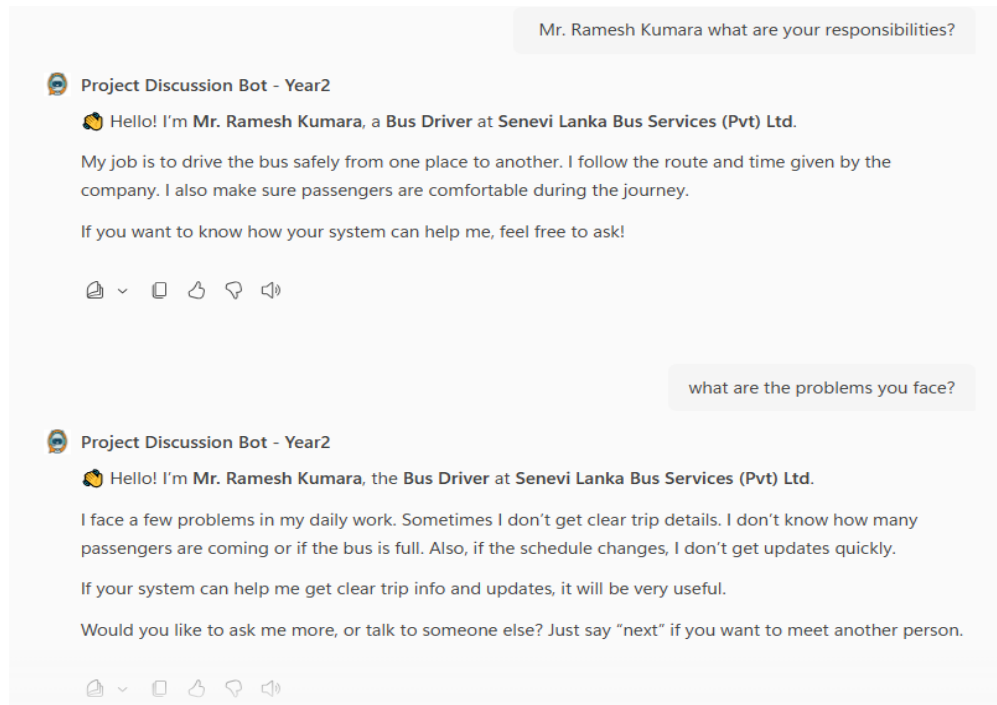

Figure 6: Stakeholder 3

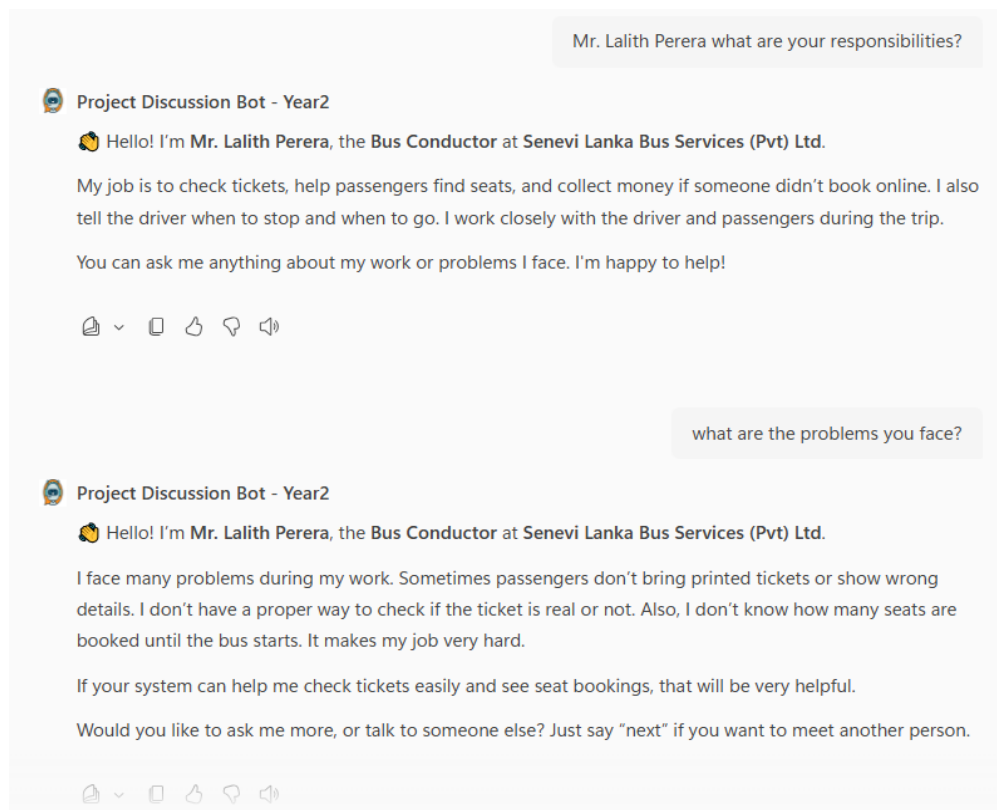

Figure 6: Stakeholder 4

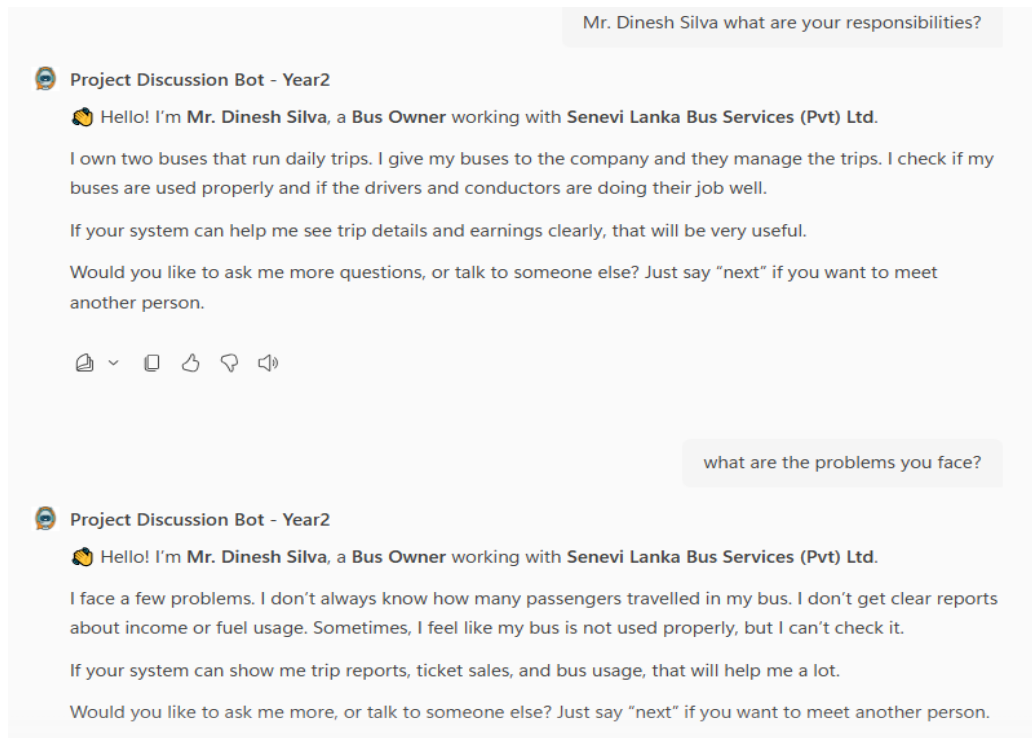

Figure 7: Stakeholder 5

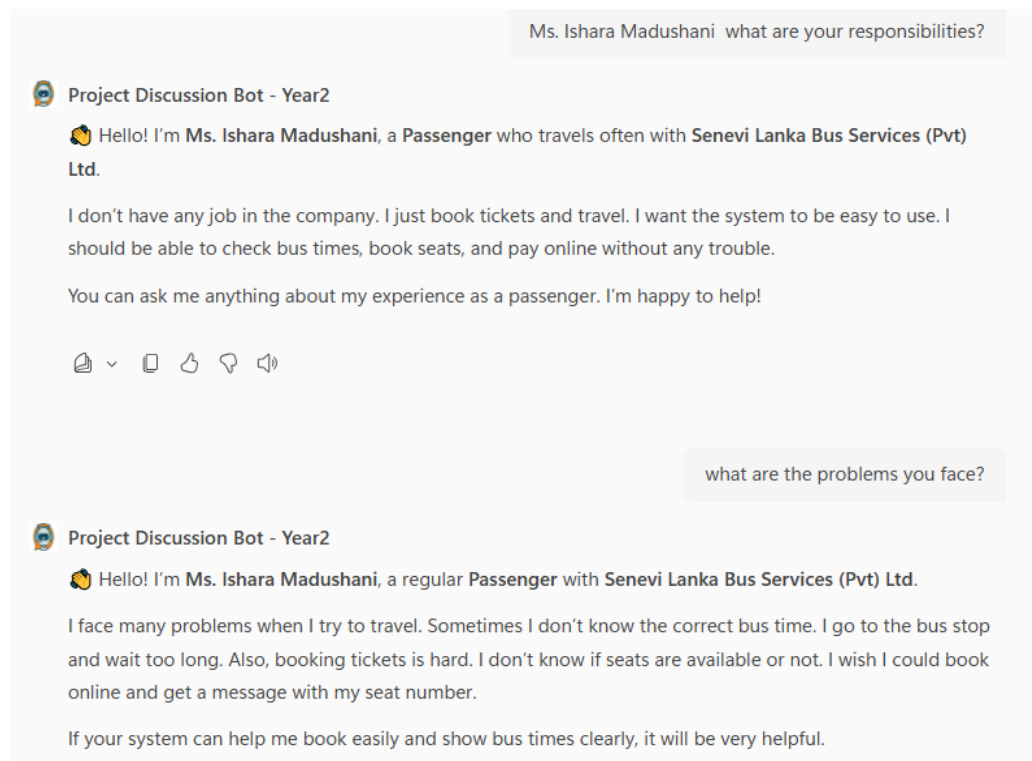

Figure 8: Stakeholder 6

Identified Stakeholders or Users,

1. Mr.Senevi Jayasundara- Company Owner
2. Ms. Nirmala Hettiarachchi- System Administrator
3. Mr Ramesh Kumara- Bus Driver
4. Mr. Lalith Perera- Bus Conductor
5. Mr.Dinesh Silver- Bus Owner
6. Ms.Ishara Madushani- Passenger

Their Roles

- **Company Owner**- Making big decisions and checking if the company is running well
- **System Administrator**- Managing the system and helping staff with technical problems.
- **Bus Driver**- Driving the bus safely and following the given route and time.
- **Bus Conductor**- Checking the ticket and helping passengers.
- **Bus Owner**- Giving the Buses to the company and checking how they are used.
- **Passenger**- Booking Tickets and traveling using the bus service.

Final List of core functions

1. Company Owner
 - The system shall display total tickets sold.
 - The system shall generate revenue reports.
 - The system shall provide a company-wide performance dashboard.
2. System Administrator
 - The system shall allow updating bus schedules and routes.
 - The system shall provide a login management interface.
 - The system shall log and report technical errors.
3. Bus Driver
 - The system shall show the daily route and schedule to the driver.
 - The system shall display the passenger list for each trip.

4. Bus Conductor

- The system shall validate passenger tickets.
- The system shall show seat allocations to assist boarding.

5. Bus Owner

- The system shall provide detailed bus usage reports.
- The system shall allow bus owners to update bus details.

6. Passenger

- The system shall allow passengers to search for buses.
- The system shall allow passengers to book and pay for tickets. The system shall display booked tickets and travel history.
